|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>COMPLIANCE</b> | <ol style="list-style-type: none"> <li>1. All raw material / tissue paper used in this product is FSC certified (FSC Mix Certificate SGSCH-COC-600096) and is compliant with FDA and EU Regulations for food contact applications.</li> <li>2. Only 100% virgin materials are used.</li> <li>3. The product is 100% recyclable.</li> <li>4. The product is manufactured in a BRC accredited plant with the requisite identification and traceability to source.</li> </ol>                                                                                |
| <b>PACKAGING</b>  | <ol style="list-style-type: none"> <li>1. Finished product is baled and wrapped in polyethylene.</li> <li>2. Bales are placed in conjunction with a pallet protector on a pallet.</li> <li>3. Pallets are stretched wrapped and strapped to secure products for transportation.</li> </ol>                                                                                                                                                                                                                                                                |
| <b>STORAGE</b>    | <ol style="list-style-type: none"> <li>1. Store in dry ventilated areas out of direct sunlight.</li> <li>2. Ideal storage temperature is between 10 – 25°C.</li> <li>3. Finished products should be used within ONE year of manufacture and should be stored in demarcated areas.</li> <li>4. Stored finished products should be monitored to ensure that undesirable environmental conditions do not affect the quality of the product (e.g. not stored with any hazardous materials / chemicals, odor, taint and of malicious intervention).</li> </ol> |

*This specification has been designed and produced specifically for the product described. This specification has not been tested for any other application and thus may not be used for the packing of any other product.*
